

Sulfa - Plant Growth Promoter

Sulfa is organic certified product containing liquid sulfur. Sulfa acts as a good plant food supplement of sulfur which is a secondary nutrient essential for plant growth. Use of sulfur as a fertilizer is not only important for increasing crop yield but it is important for quality of crop as well. Due to having fungicidal and insecticidal properties of sulfur, it is also used for the effective control of powdery mildew and red mites.

Specifications:

Product Name	Sulfa	
Type	Organic Plant Growth Promoter Organic Sulfur	
Color	Pale Yellow	
HSN Code	25030090	
Content	Sulfur – 20%	
Dose	1-2 ml/ lit	
Form	Liquid	
Packaging	500 ml, 1 lit, 5 lit, 20 lit & Bulk quantities.	

Benefits:

- Essential for Nitrogen metabolism in plants
- Used as a plant secondary nutrient (sulfur)
- Sulfur is an important part of amino acids, which are building blocks of proteins
- Sulfur performs an important role in chlorophyll synthesis and improves photosynthesis
- It activates nuclear acids and enzymes for healthy plant growth & high yield
- Prevents powdery mildew & leaf mites on crops
