

Viridine (Trichoderma viridie) – Biofungicide

Viridine is an organic certified bio-formulation produced from the selective strain of Trichoderma viridie. It has biocontrol activity over range of bacterial and fungal plant pathogens, which protects crops against various infectious diseases

Content: Trichoderma viridie spores 1×10^8 CFU / ml.

Specifications:

Product Name	Viridine
Type	Biofungicide
HSN Code	3002
Content	Trichoderma viridie
Dose	1 Strip/acre
Form	Capsule

Benefits:

Use to control Rot, wilt, smut, scurf, damping off, and other diseases caused by fungal pathogens. Provide protection against Fusarium, Pythium, Sclerotium, Rhizoctonia, Verticillium, Alternaria, and other soil-borne pathogens

Dose:

- Soil treatment: 1 Strip/acre through drip irrigation.
- Foliar application: 1 Strip for 400 liters of water

Recommended Crops:

Cereals, Pulses, Oil seeds, Cotton, Vegetables, Fruits, Ginger, Turmeric, Cardamom, etc.
