

Spuradie (Phosphorous Solubilizing Bacteria) - Bio Fertilizer

Spuradie is an organic certified bio-fertilizer developed from the selective strain of phosphorous solubilizing bacteria *Bacillus megaterium*. This bacteria convert's insoluble form of phosphorous in the soil to a soluble form which becomes easy for plants to uptake. It performs near the root zone and positively affects plant growth and yield. This product results in enhanced levels of sugar in the fruits and also improves product quality. This formulation is completely eco-friendly and does not leftover any residues in the product.

Content: *Bacillus megaterium* spores 1×10^8 CFU / ml.

Specifications:

Product Name	Spuradie
Type	Biofertilizer
HSN Code	3002
Content	Phosphorus solubilizing bacteria
Color	Pale yellow
Dose	1 Strip/acre
Form	Capsule

Benefits:

- Supplies Phosphorus to the plants
- Saves the cost of phosphorous chemical fertilizer inputs
- Avoids soil erosion and improves the soil texture and fertility
- Improves the organic content and microbial population of the soil

Dose:

- Soil treatment: 1 Strip/acre through drip irrigation.
- Foliar application: 1 Strip per acre for 400 liters of water

Recommended Crops:

Fruit crops, vegetables, tea, flowers and other crops
