

Sulfon (Sulfur Solubilizing Bacteria) – Bio Fertilizers

Sulfon is an organic certified liquid biofertilizer developed from selective strain of bacteria Thiobacillus thiooxidans. This formulation facilitates sulfur for easy uptake by plants and helps soil to maintain pH which also help plants to uptake other micronutrients.

Content: Thiobacillus thiooxidans spores 1×10^8 CFU / ml.

Specifications:

Product Name	Sulfon
Type	Bio fertilizer
HSN Code	3002
Content	Sulfur solubilizing bacteria
Color	Pale yellow
Dose	5 ml/lit or 1 -2 lit/Acre
Form	Liquid
Packing	500 ml, 1 lit, 5 lit & Bulk quantities

Benefits:

- It enhances the sulfur uptake.
- It improves quality and quantities of grains, fruits and flowers produce on plants
- It also enhance plant metabolism which improves overall plant growth

Dose:

- Soil treatment: 1 liter / acre through drip irrigation
- Foliar application: 2.5 - 5 ml per liter of water
- Seed/root dip treatment: 10 ml per kilogram of seeds

Recommended Crops:

Fruit crops, tea, vegetables, flowers and other crops
