

## Trimicro (Zinc, Sulfur, Ferrous Concertia) – Bio Fertilizers

Trimicro is an organic certified liquid bio fertilizer developed from the consortia of bacteria having diverse potential to solubilize Zinc, Sulfur and Ferrous. Providing soluble forms of above mentioned minerals facilitate for easy uptake by plants. Synergistically this formulation also provides protection against khera disease in paddy

**Content:** Liquid consortia spores  $1 \times 10^8$  CFU / ml.

### Specifications:

Product Name	Trimicro
Type	Bio fertilizer
HSN Code	3002
Content	Zn, S, Fe microbial consortia
Color	Pale yellow
Dose	5 ml/lit or 1 -2 lit/Acre
Form	Liquid
Packing	500 ml, 1 lit, 5 lit & Bulk quantities

### Benefits:

- It is used to treat Zinc, Sulfur and Ferrous deficient plant.
- By lowering pH, it facilitates easy uptake of other micronutrients.
- It also improve the hormone secretion which results progress in root growth, plant growth, soil health and ultimately quality as well as quantities of produce

### Dose:

- Soil treatment - 1 liter / acre through drip irrigation
- Foliar application - 2.5 - 5 ml per liter of water
- Seed/root dip treatment - 10 ml per kilogram of seeds

### Recommended Crops:

Fruit crops, tea, vegetables, rice, flowers and other crops
