

## Entokill - Bio Insecticide

Entokil is an organic certified Capsule bio-insecticide developed from microbial consortia of entomopathogenic fungi *Beauveria bassiana*, *Verticillium lecanii* and *Metarhizium anisoplie*. These fungi produce toxic compounds which kills range of insects.

**Content:** BVM spores  $1 \times 10^8$  CFU / ml.

### Specifications:

|              |   |  |
|--------------|---|--|
| Product Name | Entokil                                 |  |
| Type         | BVM Consortia                           |  |
| HSN Code     | 3002                                    |  |
| Content      | Beauveria, Verticillium and Metarhizium |  |
| Color        | Pale yellow                             |  |
| Dose         | 1 Strip/acre                            |  |
| Form         | Capsule                                 |  |

### Benefits:

- It is a Capsule formulation of insecticidal microbial consortia.
- It is used to effectively control most of the economically important pests such as thrips, borers, cutworms, root grubs, leafhoppers, aphids, caterpillar, weevil, japanese beetle, termites, whitefly, and mealy bug.

### Dose:

- Soil treatment: 1 Strip/acre through drip irrigation.
- Foliar application: 1 Strip per acre for 400 liters of water

### Recommended Crops:

Grapes, Pomegranates, Papaya, Custard apple, other fruit crops, Tea, Cereals, Pulses, Oil seeds, Cotton, Vegetables, etc.
