

## pH Reducer

pH Reducer is a formulation developed to reduce pH and hardness of spray and dipping water. It helps to keep water pH constant for long period of time. It reduces the hardness by forming inactive complex with elements like calcium and magnesium in hard water. It also helps plant to easy absorption of water by reducing water salinity.

### Specifications:

Product Name	pH Reducer	
Type	pH	
HSN Code	3101	
Content		
Color	Transparent	
Dose	0.5 -1 ml/ lit	
Form	Liquid	
Packing	100ml, 250 ml, 500 ml, 1 lit & Bulk quantities.	

### Benefits:

- It helps to reduce pH and the hardness of spray and dipping water to the desired level.
- When used with GA3 solution in dipping, improves the effectiveness of GA3.
- When used with insecticides and fungicides, it increases its effectiveness.
- When used with herbicides, the effect of herbicides is very good.
- It increases overall performance and effectiveness of agricultural inputs like plant growth promoters, fertilizers and insecticides.
