

Oblyvam (Vesicular Arbuscular Mycorrhiza (VAM)) – Bio Fertilizers

Oblyvam is an organic certified bio fertilizer developed from Vesicular Arbuscular Mycorrhiza (VAM) fungi. VAM plays crucial role in mobilizing essential nutrients such as nitrogen, phosphorus and potassium. Moreover, it also helps plants by facilitating certain micronutrients such as zinc, calcium, iron, magnesium and manganese.

Content: Vesicular Arbuscular Mycorrhiza (VAM) spores 1×10^8 CFU / ml.

Specifications:

Product Name	Oblyvam	
Type	Bio fertilizer	
HSN Code	3002	
Content	Mycorrhiza	
Color	Brownish black	
Dose	1 Stripe (7 Capsules)/Acre	
Form	Capsule	

Benefits:

- Oblyvam makes the plant root system to get easily access to the usable form of nutrients.
- Secondary metabolites produced by VAM fungi, provides protection from most of soil borne pathogens.
- It also improves water movement in the rhizosphere and plant system which increases tolerance in draught stress.

Dose:

- Soil treatment - 1 Stripe (7 Capsules)/Acre through drip irrigation

Recommended Crops:

Fruit crops, tea, vegetables, flowers, and other crops
