

Rhizobact (Rhizobium) – Bio Fertilizers

Rhizobact is an organic certified liquid bio fertilizer developed from Rhizobium spp. This formulation strongly supports plant growth through nitrogen availability especially in leguminous crops. Nitrogen content improves plants amino acid and protein synthesis which ultimately enhance plant health and immune system.

Content: Rhizobium spores 1×10^8 CFU / ml.

Specifications:

Product Name	Rhizobact
Type	Bio fertilizer
HSN Code	3002
Content	Rhizobium spp
Color	Whitish
Dose	5 ml/lit or 1 -2 lit/Acre
Form	Liquid
Packing	500 ml, 1 lit, 5 lit & Bulk quantities

Benefits:

- It improves plants amino acid and protein synthesis.
- It improves plant health and immune system

Dose:

- Soil treatment - 1 liter / acre through drip irrigation
- Foliar application - 2.5 - 5 ml per liter of water
- Seed/root dip treatment - 10 ml per kilogram of seeds

Recommended Crops:

Fruit crops, tea, vegetables, flowers and other crops
